PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of hands-on experience engineering production web platforms, distributed serverless architectures, and real-time systems end to end. Lead developer of the EPD community platform (Next.js, Cloudflare Pages & D1 distributed SQLite, Telegram Bot integration), serving event operations with sub-50ms edge latency. Proficient in TypeScript and Python across backend and frontend, with strong expertise building high-performance UIs in React/Tailwind/shadcn and resilient REST APIs in Django. Pursuing a Bachelor of Science in Computer Engineering at University of Birjand.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3 / SASS
Frontend:	React 18, Next.js (App & Pages Router), Tailwind CSS, shadcn/ui, Redux Toolkit, Context API, Responsive Design
Backend & APIs:	Python, Django, Django REST Framework, Django Channels (WebSockets), Node.js, RESTful APIs, Event Architecture
Cloud & Serverless:	Cloudflare (Pages, Workers, D1 SQL, KV), PostgreSQL, SQLite, Redis, Docker, Vercel, CI/CD
Tools & Practices:	Git/GitHub, Postman, Linux/Bash, Agile/Scrum, SOLID Principles, Web Performance Optimization

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer — EPD Community — Remote · 2024 – Present

Next.js · Cloudflare Pages · Cloudflare D1 · SQLite · Tailwind CSS · Telegram Bot API · Edge Functions

- Architected and deployed the production web platform for EPD (**epdcommunity.ir**), delivering sub-50ms global response times via Cloudflare Pages and distributed D1 edge SQLite storage.
- Engineered serverless backend endpoints handling ticketing, session registrations, and automated payment callback webhooks with strict transactional integrity.
- Built bidirectional Telegram Bot automation integrating webhook verification for instant attendee check-in and automated event ticket dispatches.
- Implemented accessible, responsive UI with custom RTL typography (Vazirmatn), scoring 98+ on Core Web Vitals performance benchmarks.

Full-Stack Engineer — Pipeline Risk Assessment Systems — Mashhad, Iran (Remote) · 2024 – 2025

Next.js · TypeScript · Python · Django · PostgreSQL · Tailwind CSS · RESTful APIs

- Engineered an enterprise risk evaluation dashboard for natural gas utility infrastructure, translating complex mathematical risk matrices into real-time interactive visual data.
- Developed modular Next.js data tables, dynamic chart filters, and high-performance computation grids handling extensive telemetry with zero client-side latency.
- Designed RESTful API endpoints with Django REST Framework and PostgreSQL, optimizing database queries for multi-variable pipeline risk scoring.

Frontend & Web Development Intern — ACECR (Academic Center for Education & Research) — Birjand, Iran · Dec 2023 – Aug 2024

React · JavaScript · Bootstrap · REST APIs · Git · Postman

- Developed responsive web interfaces, resolved cross-browser rendering inconsistencies, and optimized mobile-first layouts under the IT department lead.
- Integrated RESTful APIs using Axios and modern fetch patterns, implementing structured loading skeletons and defensive error handling.
- Contributed to team sprints with Git/GitHub workflows, pull request reviews, and issue tracking.

KEY PRODUCTION PROJECTS

Automated Lead Radar & AI Proposal Engine — TypeScript · Cloudflare Workers · Workers AI · 2024 – Present

- Built a 24/7 serverless event-driven scanner scraping international contract opportunities; integrated Cloudflare Workers AI (Llama 3.1) to generate customized outreach pitches dispatched directly to Telegram.

Real-Time Collaborative Messaging Platform — Next.js · Django Channels · WebSockets · Redis · 2024

- Engineered a full-stack real-time messaging application with WebSocket connection pooling, user presence tracking, and low-latency bi-directional data exchange via Redis message broker.

EDUCATION

Bachelor of Science in Computer Engineering — University of Birjand — 2023 – 2027 (Expected)

Core Coursework: Data Structures & Algorithms, Database Design, Operating Systems, Software Engineering
