ALIREZA RAHIMAPANAH

Full-Stack Software Engineer (React • Next.js • Django • Python)

a.rahimpanah71@gmail.com • cv.alirezarp.ir • github.com/say-alireza • linkedin.com/in/alireza-rahimpanah • Remote (Worldwide)

TECHNICAL SKILLS

Frontend: React.js, Next.js (App & Pages Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, HTML5, CSS3

Backend & APIs: Python, Django, Django REST Framework, Django Channels (WebSockets), Node.js, RESTful APIs, Event-Driven Systems

Databases & Cloud: PostgreSQL, SQLite, Cloudflare (Pages, Workers, D1 SQL, KV), Redis, Docker, Vercel

Tools & Practices: Git/GitHub, Postman, CI/CD, Responsive Design, State Management, Agile/Scrum

FEATURED PRODUCTION PROJECTS

EPD Community Platform (Live at epdcommunity.ir) 2025 – Present

Next.js, Cloudflare Pages, Cloudflare D1 (Distributed SQLite), Tailwind CSS, Telegram Bot API

- Architected and deployed a production event & ticket registration platform with distributed edge computing and sub-50ms latency.
- Engineered serverless backend endpoints integrated with Cloudflare D1 database and automated payment gateway callbacks.
- Implemented automated Telegram Bot notifications and verification webhooks for seamless attendee check-in and attendee management.

Industrial Pipeline Risk Assessment Dashboard 2024 – 2025

Next.js, TypeScript, Django, PostgreSQL, Tailwind CSS

- Built an enterprise dashboard for natural gas utility infrastructure to calculate and visualize complex risk assessment metrics.
- Developed modular frontend components with dynamic chart filters, tabular calculations, and high-performance data grids.
- Integrated RESTful APIs connecting Django ORM to Next.js with robust error boundaries and optimistic UI updates.

Automated Gig Radar & Proposal Engine 2024 – Present

TypeScript, Cloudflare Workers, Cloudflare KV, Workers AI (Llama 3.1), Telegram Bot API

- Engineered a 24/7 serverless event-driven monitoring system scraping remote developer contract listings across LinkedIn and web boards.
- Integrated Cloudflare Workers AI to generate customized, context-aware 2-sentence client outreach proposals for newly discovered jobs.
- Built instant Telegram alert dispatch with deduplication storage in Cloudflare KV, processing leads in real time.

Real-Time Collaborative Chat Platform 2024

Next.js, Django Channels, WebSockets, Redis, PostgreSQL

- Built a full-stack real-time messaging application supporting instant message broadcast, user presence, and file exchange.
- Architected WebSocket connection management using Django Channels and Redis message broker for low-latency delivery.

EXPERIENCE

Full-Stack Web Developer — Freelance & Contract 2024 – Present

- Delivered responsive web applications, custom management dashboards, and automation tools for clients and startups.
- Maintained high code quality with reusable TypeScript components, type-safe API schemas, and automated CI/CD deployments.

Frontend & Web Development Intern — ACECR (Jahad-e Daneshgahi) Dec 2023 – Aug 2024

- Built responsive client-facing web interfaces, resolved cross-browser compatibility issues, and optimized mobile layouts.
- Integrated RESTful APIs using Axios and modern fetch patterns, implementing loading skeletons and error handling.

EDUCATION

Bachelor of Science in Computer Engineering — University of Birjand 2023 – Present

Core Coursework: Data Structures & Algorithms, Database Design, Operating Systems, Software Engineering
